### **EXAMINER'S STATEMENT FOR REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: claims 6 and 12 are allowed because the references cited fail to teach, as applicant has, a cross polarization interference canceller comprising first and second local oscillators each of which converts one of the signals into an IF signal with a phase-difference detector which detects a phase-difference between local signals transmitted from the first and second local oscillators, and transmits a phase-difference signal indicative of the thus detected phase-difference where the phase-difference detector includes a multiplier which multiplies signals transmitted from the first and second local oscillators, by each other to thereby transmit a frequency-difference signal, an analog-digital converter which converts the frequency-difference signal to a digital signal, a numerical controlled oscillator which transmits a local phase-difference signal, a phase comparator compares the local phase-difference signal and the frequency-difference signal to each other, and transmits a difference signal indicative of a difference between the local phase-difference signal and the frequency-difference signal, and a filter which controls a frequency of the local phase-difference signal in accordance with the difference signal, as the applicant has claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
